

Landis Homes Update August 24, 2020

Two stories you may have seen in the news recently are the distribution of point of care antigen testing devices to nursing homes and funds available for frontline workers through a Covid-19 PA Hazard Pay Grant.

Landis Homes has been informed that we are now on the distribution list for the next wave of antigen testing devices and test kits. Based on information from LeadingAge, it appears that almost all Lancaster County skilled nursing facilities are now included on the list. Distribution is expected by September 30.

The \$50 million dollar Covid-19 PA Hazard Pay Grant, available to certain types of qualifying businesses, was designed to provide additional compensation for eligible employees from mid-August through late October. Employers needed to apply for grant funds and Landis Communities applied promptly hoping to get in early before the funds were depleted. Last week we learned that there were apparently \$800 million in grant requests and understand that the \$50 million in grant money was then distributed based on a lottery system. Landis Communities unfortunately was not selected.

PPE Update

Current supplies of PPE are good. We participated in a survey last week through Lancaster County to help identify potential needs for PPE in the event of second wave of COVID-19. Their goal is to create a county stockpile in case of emergency.

Residential Living Reopening

- Construction safety projects are occurring indoors if the risk of not doing the project could negatively impact resident safety.
- **As a reminder, visitors** must continue to utilize the self-screening kiosks when arriving on campus, wear face coverings and practice hand hygiene. Visitors are not to be in indoor common areas of campus and are not to stay overnight in resident accommodations.

Healthcare and Personal Care Reopening

- **Healthcare Reopening** continues in Step 3 with scheduled in-person visits.
- **Personal Care Reopening** is in Step 1 of their plan. If all remain free of COVID-19, we will move to Step 2 on Wednesday and in-person visits would resume and activities could be held with 10 or fewer people participating.
- Any positive COVID-19 test by a resident or team member will move reopening back to the beginning of the plan. Full details of both plans may be found on the Landis Homes website.

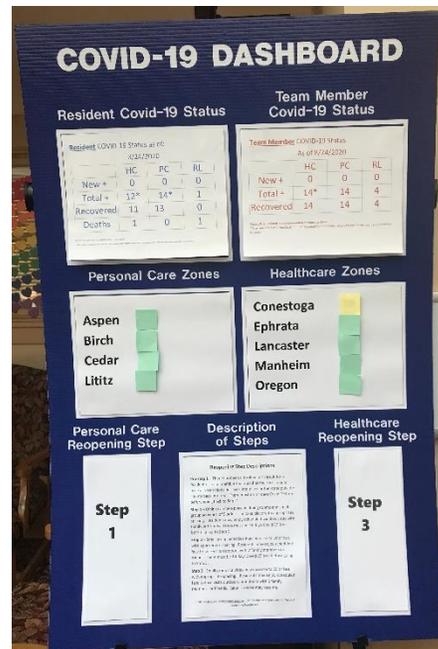

Screening

In an effort to be good stewards of our resources, team member screening between the hours of 5:00 p.m. through 5:00 a.m. is now being conducted by the security team in the Crossings vestibule. Once screened, team members will leave Crossings to enter their work area directly. They will not walk through buildings.

Confirmed Cases & Testing

We are not aware of any positive cases of COVID-19 or any pending resident tests at this time. This picture is of a poster located at the team member screening location in Dogwood. You will see that currently all Healthcare and Personal Care areas are in Green, other than the designated COVID-19 area, where residents returning to campus are located for quarantine. This area is currently Yellow.

Town Meeting

The next Town Meeting is scheduled for September 2! Please note any questions you would like answered on the form below or email lethridge@landis.org

Reminders:

- **Activity Logs** – please continue to note where you are going when you leave your home.
- **Updates Posted** – check the Landis Home website for regular COVID-19 updates. Family and friends have access to videos and written information at www.landishomes.org/COVID

Residents and family members may contact Jenny Sheckells with questions or concerns at jsheckells@landis.org or 717.381.3573.
